WHAT IS A CHIMNEY SWIFT?

Chimney Swifts are small sooty-coloured cigar-shaped birds with long thin wings. They are heard and seen high in the air over Schomberg feeding on flying insects. They build their nests almost exclusively in chimneys. Once common, their numbers are dropping rapidly and they are now considered threatened.

We are looking for volunteers to help identify the number of Swifts living in Schomberg and where they nest and roost.

**Please join us TUESDAY APRIL 15 AT 7:30 PM
at the SCHOMBERG PUBLIC LIBRARY to learn about
this fascinating bird and to become involved
in their protection.**
